Personal Recommendation Letter – Petter Tesdal

To Whom It May Concern,

I am pleased to recommend Petter Tesdal, who has worked part-time for TechnipFMC Subsea Services since June 1, 2024. Petter was part of a team of three students from the Western Norway University of Applied Sciences that developed a Digital Project Management Tool for the overhaul of valve trees (XT GATES) for TechnipFMC Subsea Services in the spring of 2024 as their Bachelor's thesis.

Following this, Petter was employed part-time at TechnipFMC after completing his Bachelor's degree, with the main task of further developing the system in collaboration with the company's users. His part-time employment concluded on February 28, 2025, when the development work on XT GATES was completed.

The XT GATES system has become a very useful tool for TechnipFMC's XT Service Team and is used daily in the follow-up of our projects. Throughout both the initial period working on the Bachelor's thesis and the subsequent period as a part-time employee, Petter has been a very positive contributor to the success of this project.

He works in a structured and efficient manner, is creative and diligent, and has a pleasant personality that fits well into a team. We highly recommend Petter and are happy to provide further information to anyone interested.

Best regards

Wilhelm Martin Monsen
